

Parking Garage Safety Tips

A September 2003 survey conducted by the Downtown Lincoln Association found that 98.6 % of people surveyed found downtown Lincoln to be very safe or safe.

Tips:

- Keep valuables out of plain sight, preferably locked in the trunk of your vehicle
- Keep doors locked and windows up as your drive through the facility
- If possible, park in a well-lit area
- Become familiar with the locations of security cameras and emergency call buttons located throughout the facilities
- Report suspicious activity or persons to an attendant
- Lock every entrance to your vehicle
- Use the elevator when possible since they have security cameras that are monitored in real-time*
- Return to your vehicle in a group - if you see suspicious activity ask an attendant to escort you to your vehicle
- Have your keys ready as your approach your vehicle
- Look inside your car before you unlock the door and get in, if you are concerned for any reason, simply walk past it and find help
- Leave the parking spot immediately after everyone is situated and seatbelts are fastened – don't stay and write notes, balance checkbooks or talk on the phone
- If you are unable to locate your car, don't be afraid to ask a city parking attendant for help – they are happy to help!

** In City of Lincoln facilities. Please contact private garage owners for information on those facilities.*
